3

Je schneller der Zug fährt, desto größer muß die Distanz zwischen Kontaktunterbrecher-Schiene 1 und 2 sein, um das Anhalten des Zuges zu ermöglichen.

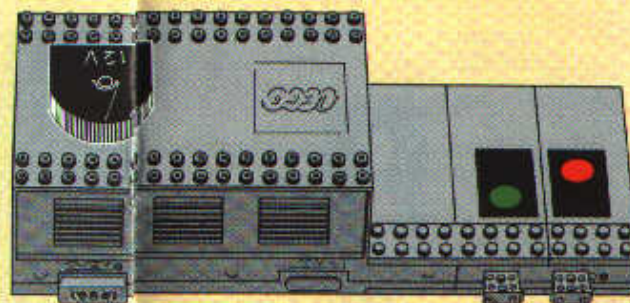

The faster your train goes the greater must be the distance between breaker rails 1 and 2 to make the train stop automatically when the signal is red.

Plus le train roule vite, plus la distance entre les deux interrupteurs de courant 1 et 2 doit être grande pour permettre au train de s'arrêter automatiquement devant le signal rouge.

Jo hurtigere toget kører, jo længere afstand skal der være mellem afbryderskinerne 1 og 2 for at få toget til at standse.

Mitä nopeammin juna liikkuu sitä pitempi tulee virrankatkaisukiskojen 1 ja 2 välin olla, jotta juna pysähtyisi.

4

Quanto più è veloce il treno, tanto più bisogna aumentare la distanza tra gli interruttori di corrente 1 e 2 per farlo fermare.

Ju fortare tåget kör desto längre avstånd skall det vara mellan avbryterskenorna 1 och 2 för att man skal få tåget att stanna.

Geff de trein voldoende rem-afstand door de kontaktonderbrekende rails 1 en 2 niet te dicht bij elkaar te plaatsen.
